## AI-native booking software for service-based businesses that run on WhatsApp

**Who it's for:** Service-based businesses in the UAE/KSA. Market wedge: pet service-operators (vets, groomers, daycare, boarding, pet training) first as there is a software gap. Next: beauty, wellness & fitness, with stiff competition from Fresha, Mindbody & custom-enterprise grade tools.

**Why now:** Service-based businesses juggle WhatsApp, booking, payments and loyalty/reminders as four disconnected tools — no provider solves for this today. Cami is built as one system from day one: WhatsApp as the booking and support channel, tied directly to CRM-linked scheduling, loyalty, reminders and in-chat payments. Winning this disconnected WhatsApp and payments layer as native integrations is Cami's moat.

### WHAT WE ARE SOLVING

# 90%

of daily front-desk activity happens in Calendar + Invoicing. → *These modules must be feature-rich from day one.*

# 70%

of end-customer booking inquiries come via WhatsApp — today with no OS integration. The remaining 30% can be self-served via real-time online bookings. → *WhatsApp-native unibox is the competitive moat in MVP.*

# 40%

of WhatsApp inquiries come outside business operating hours, handled manually today. → *AI conversational scheduling is core IP for Cami — not a v2 feature.*

## Customer Journey

Cami sits between the customer and the business, capturing every touchpoint, from first message to final payment – in one connected system.

**CamiPay** enables customers to transact with the business via

**Online Payments**

Payment links, catalog with booking policy, deposit reminders & gift card, package purchases.

**POS Payments**

Terminal integration with Cami's invoicing module.

|                           |                      |
|---------------------------|----------------------|
| Appointment Scheduling    | Auto-Reminders       |
| Invoicing & Reporting     | Smart Marketing      |
| Team Members Controls     | Inbox                |
| Service & Product Catalog | Two-Way Intelligence |
| Vouchers & Packages       | CRM & Loyalty        |
| Online Bookings & Forms   | Custom App           |
| Clients & Pets            | AI Reporting         |

**WhatsApp Communication** connects customers to the business via

**Inbox**

Two-way messaging, auto-reminders and smart marketing- captured straight into CRM & loyalty.

**Booking & Scheduling**

whatsapp, online bookings and forms flow directly into the calendar.
